

## Framework for GUI development

Component name	GUI Framework		
Category (IP/ Reusable)	IP	Component type (HW/SW/product etc)	SW
HW Platform	NA	SW Platform /OS	Windows
Applications / applicable products	GUI development (.Net)		
Market/ industries applicable	General		
Product Description	Our GUI Framework, suitable for any engineering software system which has got a set of GUI screens. This re-usable framework with a proven architecture simplifies the GUI layer development and reduces the implementation time thereby reduces time to market.		
Features /benefits	The main features and functionalities of the GUI-framework include: <ol style="list-style-type: none"><li>1. Navigation Management</li><li>2. Screen Management</li><li>3. Sub-Screen Management</li><li>4. Title panel management</li><li>5. User and user group management</li><li>6. User access rights management</li><li>7. Command Handling</li><li>8. Multi Language Support</li><li>9. Context Sensitive Help</li></ol> Highly customizable architecture of the GUI Framework simplifies the GUI layer implementation of engineering application systems which
